

FREE VACCINATIONS FOR LIFE

No really, they are free.

We believe the annual physical exam is the most important tool for keeping your pet healthy. Vaccinations are necessary, but the one on one time with the veterinarian is what will ensure a long life for your pet.

How it works: You pay a one-time enrollment fee and as long as your pet comes in for their annual physical exam, all of the core vaccinations they need will be free. Right now, the physical exam fee is \$60.00. Canine enrollment is \$75.00. Canine vaccines covered by the program are, DAPP, Leptospirosis, Bordetella and Rabies.

For cats, enrollment is \$55 and FVRCP, Feline Leukemia and Rabies are covered.

Vaccinations can range in price from \$16 to \$32 each, so you will be saving significantly over the life of your pet. For the average pet you will save over \$25 on your very first visit.

Depending on the type and age of your pet we will have other recommendations for optimal health. For example, heartworm tests for dogs, feline leukemia test for cats and intestinal parasite exams for both dogs and cats.

We look forward to partnering with you in creating the opportunity for your pet to have a long healthy life. Call us today!

**Your pet's health is
our priority.**

**We want you to have
exceptional,
affordable care.**

**Your pets will love
our Vet.**

**With our program
you won't have to
worry, your pet will
get what they need
every year.**
